Token WhitePaper
Version 1.0

<https://shibrocket.net>

Introduction

Welcome to Shiba Rocket's white paper. As an early investor, we can tell you that you're a potential investor, and you are joining one of the most exciting new DeFi project we're launching on the Binance Smart Chain (BSC). This is a fruit of a long term research and ambition of launching a powerful and successful BSC project. The Goal is to maximize investor returns, community engagement and token utility. Driven by data, informed by insight, we seek to bring innovation into everything we do. We learned, analyzed, and that is where SHIBA ROCKET is born. If you have something to think about, just congratulate yourself for being part of this project.

The Opportunity Behind The Token

The world is becoming bigger, we're evolving but at the same time, living become more complicated. Young people are suffering all over the World, especially in some third-part countries. As we know that the blockchain technologies is evolving and can change everything. We've seen that the World where Young people can have access to the finance management, it will be easy to live. Reduce the pain and financial insufficiency is one of are main goal. That is the one of the main goal of the development of this token. If you are here, you're lucky.

Now you know the Goal. But to make every thing easy, those people need to understand how money works, and that is neither taught at home nor at school. 93% of them say they feel confused & frustrated when the subject is finance. So, with all debts to pay, lifetime goals and dreams to achieve, they must attain financial wellbeing and become comfortable with money and their economic status.

That is where Shiba Rocket comes in, providing content that teaches them how money works while they invest, opening opportunities for wealth creation. Our goal is to foster human connection through financial literacy, filling this gap in the crypto and financial market and preparing the next generation of investors.

Origins Of The Token

Obsessed by that vision, Shiba Rocket was created on Binance Smart Chain (BEP20) in December 2021. As a community of believers, we started to take crypto enthusiasts joined together.

After a couple of weeks of work, the community start growing, and we're happy to see what we're doing today to help the world and when we think about what will be done, it is just a mind-blowing. Create a token that planning to change a lot of person's life all around the globe, we don't want that to just be a dream and vision but reality, it is about hope.

Community

For us, we have one of the best Community on the Market and our pledge to our community is not simply a common catchphrase, rather it's the underlying value that shapes every decision that we make. Our community of investors deserve a project where they know they have the best and brightest minds working together to achieve financial freedom and success. Through an elastic supply mechanism to dynamically adjust the supply to meet an increasing price peg, our community will be subjected to a mathematically guaranteed reward system alongside exciting contests, incentive-based reward programs and a myriad of opportunities to earn more through a variety of posts and positions that will help support the overall community goals.

Transparency

Talking about transparency, it is not easy to explain how care about and our pledge to transparency, defines how we operate as both a team and an overall community. We will be trying to be transparent as much as possible to make this project successful. There are many moving pieces that all must come together to create a successful BSC token with such an ecosystem, and our community is ensured that they will have full access and understanding of all aspects of our team. And this is how our team make benefit from the support of our community and gain insights from community suggestions. For us, that our community is not just investors, but also passionate and talented traders, marketers, and innovators, and we strive to maximize their talents and resources to further the success and potential of our project.

Innovation

Innovation is one of the most common thing out there. Why ? Because they are tons of project actually like ours, but our pledge also defines what truly sets Shiba Rocket apart from every other current project, and that is our pledge to innovation. First, our tokenomics, customized Dapp and overall ecosystem which will revolutionize the landscape of BSC token economics and define what we're doing. This exciting new utility is just the first step in our drive to provide the Shiba Rocket's community with the most innovative and rewarding utilities as we work together to maximize investor returns and community growth. Investors are today confusing by meme coins and the real truth they need is innovation, talent, utility, and transparency. We made that easy and our community will lead the next generation of innovative, utility-based project that will maximize community support and resources and continually evolve and add to our growing utility and marketing functions.

ECOSYSTEM

Our project is fully decentralized and community-focused . The fees go from 5% from the 110% tax on every transaction and is taken and re-distributed to all token holders in RSHIB. Each transaction will automatically add liquidity to the Pancake swap pool. Shiba Rocket rewards investors just for holding the token, and the amount of reward earned increases the longer an investor holds the token. That is not all, token holders are also rewarded for the success of the project, which comes with an increased volume of transactions.

Each time liquidity is deposited in a pool, special tokens called liquidity tokens are issued to the source address, and they are directly proportional to the amount of liquidity that is added to the pool. Each time a transaction takes place, the fee that is charged is distributed proportionally to all LPs (liquidity providers) in the pool at that given time of the trade. To collect the basic liquidity, plus the charges accumulated during the time their liquidity was locked. The token placed into a liquidity pool is referred to as a value or a derivative. This way, the supplier takes ownership rights of the reward paid on the total amount supplied. Shiba Rocket was launched with an initial supply of liquidity in the form of BNB/RSHIB LP Tokens. This is done to make investors content that the project team is committed to the success of the project with zero malicious intent or rug pull intent.

SHIBA ROCKET'S DYNAMICS

SHIBA ROCKET is a token that was launched on the Binance Smart Chain network on 20 th December 2021. 5% redistribution + 2% burn on every transaction.
